- Column 8: **Status 30 Jun 23** – animals housed at Zoos Victoria as at 30 June 2023
- 1.0.0 = 1 male
- 0.1.0 = 1 female
- 0.0.1 = 1 sex has not been determined
- 3.6.1 = 3 males, 6 females and 1 sex unknown/not determined

This Annual Inventory Report has been generated using ZIMS (Zoo Information Management System), a web-based animal-records data-based managed by Species 360. Common names and scientific names used by ZIMS on occasions may differ from those normally used at Zoos Victoria. On occasions, numbers captured in these inventory reports may deviate from actual numbers. Whenever possible, manual edits have occurred to amend these inconsistencies.

### Zoos Victoria's contribution to wildlife rescue and rehabilitation

Every year hundreds of injured and orphaned wildlife are brought to Zoos Victoria for assessment, treatment and care. Many of these cases involve trauma, such as car accidents or attack by cats and dogs, resulting in fatal injuries. These cases may require euthanasia. Some cases may require rest and can be released within 24 hours of arrival. Some cases have minor injuries, and can be transferred to registered wildlife shelter operators having the appropriate expertise for further care. ZV veterinary staff will continue to monitor the health of cases transferred to wildlife carers. During 2022/23:

- Melbourne Zoo, received 1043 wildlife admissions, of which 215 were successfully treated and returned to the wild, whilst 56 were transferred out to registered wildlife carers for further care and release;
- Werribee Open Range Zoo, received 1032 animals, of which 62 were successfully treated and 170 returned to the wild, whilst 200 were transferred out to registered wildlife carers for further care and release.
- Healesville Sanctuary, received 1807 animals, of which 295 were successfully treated and returned to the wild, whilst 398 were transferred out to either registered wildlife carers for further care and release or other government organisations; and,
